THREE-STORY BUILDINGS: ELEVATION AT ENTRANCE
MATERIAL KEY

Building Elevations

FOUR-STORY BUILDINGS: ELEVATION AT ENTRANCE
MATERIAL KEY

Public Policy

Hampton Community Plan (2006, as amended)

Promote compatibility and synergy among different land uses.

Safeguard the integrity of existing residential neighborhoods.

Prioritize protecting natural systems and restore or recreate natural systems where they have been compromised.

Partner with Langley Air Force Base to promote compatible land uses within the flight approach zones and noise areas associated with the AICUZ program.

Langley AFB Analysis

- Permitting the proposed development:
 - Could preclude the future relocation of the existing runway, impacting the JBLE-Langley flying mission
 - Would locate apartments within runway clear zone and APZs
- Majority of the proposed development currently lies within the 65-70 dB DNL noise contour
- Housing types are not recommended within 65-69 and DNL 70-74 Noise Zones
- Rezoning would be incompatible with surrounding existing land uses

Community Meeting

March 2022

Sunday	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday
		1	2	3	4	5
6	7	8	9 	10	11	12
13	14	15	16	17	18	19
20	21	22	23	24	25	26
27	28	29	30	31		

Staff Analysis

High density residential conflicts with City policies:

- Community Plan
- JBLE-Langley North Flightline DAP

Environmentally sensitive areas:

- Wetlands located on site
- Wetlands connected to tidal feature
- Wetlands are a RPA feature

Incompatible with existing land use pattern:

- Low density residential
- Public/semi-public

Proffered Conditions

- Multifamily Use
- Concept Plan
- Density
- Building Elevations
- Building Materials
- Community Amenities
- Landscape Buffer
- Site Lighting

Recommended Use Permit Conditions

- Issuance of Permit
 - Compliance with rezoning proffers
 - On-site management
 - Compliance with applicable laws
- 

Recommendation

Planning Commission and
Staff recommend
denial #22-0181

(If approved 13 proffered conditions
are attached)

Recommendation

Planning Commission and
Staff recommend
denial #22-0183

(If approved, 5 conditions are
recommended to be attached)
