Thank you for your interest in purchasing the "Molitor Machine" Ceiling Breach and Pull Prop and the Brackets for the Ladder Raise and Extension Props. A D F Steel, Inc. is the designer and sole manufacturer of these props for the Candidate Physical Ability Test. These props were designed and built in conjunction with the IAFF and the IAFC during the validation phase of the CPAT. These are the only props tested and approved to be used with the CPAT, and any variation from the approved props would jeopardize the validation of the testing process.

The "Molitor Machine" and the Ladder Prop Brackets are distributed by CPAT Distribution, Inc. CPAT Distribution can be contacted at 626-599-8814 or by fax at 626-599-8824.

If I can be of any further assistance, please feel free to contact me at the numbers listed above.

Sincerely,

Michael Molitor
