Hampton, VA 23669

Dear Ms. Law,

My name is Chris Meyer, and I'm the Director of Client Partnerships in the Southeast US for Intellicheck Corporation. Intellicheck provides identification authentication and verification solutions for national defense, law enforcement, retail, and hospitality markets.

Intellicheck's Law ID mobile solution is a unique and only know solution of its kind mobile solution that allows sworn officers to scan and authenticate the DL barcode data on state issued IDs. Law ID is also the only solution of its kind that then takes that authenticated data and then allows sworn law enforcement to run full DOL/DMV, State and Federal criminal justice databases directly from the officer's smartphone device.

Law ID is powered by Intellicheck's patented software that verifies the authenticity of an ID by reading and verifying the formatted information encoded in the bar codes. To date, Intellicheck has over 24 current patents associated with the scanning of an ID card for the purpose of authenticating, parsing and extracting the data from those ID cards. Our patent pending State Aware feature also ensures automatic compliancy with state laws for retaining and displaying personal identifiable information.

Any other unknown solution that states being able to perform the same functions is in direct violation of our patents related to scanning and authentication of state issued ID's.

Please let me know if I can be of further assistance or if there are any further questions.

Warm regards,

Chris Meyer
