Narrative Statement for Rezoning & Use Permit Applications
One (1) Memory Care Assisted Living Facility
[To Be Franchised with “BeeHive Homes” as BeeHive Homes of Hampton Memory Care]
for 1807 West Queen Street, Hampton, Virginia 23666

Dr. Arnita Snead Brooks, owns the one acre of property at 1807 West Queen Street, Hampton, Virginia 23666. She has created and is the chief executive owner / manager of Brooks-Joseph Memory Care I, LLC (the operating entity) and Brooks-Joseph Memory Care, II, LLC, (the holding entity) established in preparation of franchising with BeeHive Homes. She plans to build a 20-room senior living memory care facility, Brooks-Joseph Memory Care, LLCs I & II, planning to be DBA, “BeeHive Homes of Hampton Memory Care (BH3MC).” BeeHive Homes is based in Boise, Idaho, has a 35-year history of senior living care with 190 Homes in 20 states. She first became acquainted with this franchise while living in Vernal, Utah and writing her doctoral dissertation, *A holistic, responsive model for a Christian compassionate-care center for the disabled elderly of Hampton, Virginia.*

Rezoning is needed because 1807 West Queen Street is zoned as R-11 and the memory care assisted living facility will require rezoning for multifamily, MD-4. The proposed use of the site is to build one memory care senior assisted living building with twenty (20) rooms, 11,853 +/- occupied square feet in size, with a building construction type of VB with I-1 CONDITION 2 construction use code and will be in compliance with all Virginia state and local building codes, including ADA guidelines. Each ADA compliant room is also equipped with a private bathroom. Two (2) bathrooms will be added for staff for a total of twenty-two (22) bathrooms (which includes one for each resident’s room).

A three-tiered fire life protection / detection / signalization / suppression system will be included in construction with smoke compartmentalization to protect memory care residents. The site is very limited in space and does not provide enough area to construct a standard fire department turnaround. Per Richard Barnes LS, Civil Design Project Manager of ATCS, Brooks-Joseph Memory Care Civil Engineer, an evaluation of the site layout taking the elements stated above was performed by the Hampton Fire Department, and it was determined to be acceptable.

The building’s exterior will be cementitious fiber board siding above stone watermark, including maintenance free trim in natural color tones. Elevation drawings, general floor plan and roof plans of the Home are attached. The building (one story + mechanical attic) is 24’-4” to the roof edge. The following items are being placed in a “roof well” accessed from a mechanical building attic:

- A DOAS unit – make up air for the kitchen hood system
- An exhaust discharge for the kitchen cook-line
- 1-2 roof top furnace-AC units for the common area heating and cooling
- An emergency generator for refrigeration and environmental safety
- Four (4) skylights for day lighting into the common living room areas.

Due to the very tight site, the “roof well” is intended to offer audio and visual shielding from the nearby residences. There is no anticipated impact to adjacent properties. The anticipated impact to city services would be minimal as electrical power, internet, city water, sewer, and a fire hydrant are on the site.

Per Civil Engineer Barnes: “As shown on the City of Hampton’s GIS, there is an existing sanitary sewer manhole located to the south of the proposed building at the rear of Lot 10 in Prestige Park, which provides a potential

connection point for sanitary sewer for this project. The manhole appears to be shallow but may be able to accept a gravity connection (depending on finished floor of the building), or a small force main if it is determined that an on-site private pump station is required.

The site is relatively flat, with elevations ranging from 12.4' to 13.2' above mean sea level. An existing drainage inlet located at the rear of the property provides a connection point for a stormwater drainage system. Currently, the City of Hampton stormwater requirements state that development under one acre does not require a stormwater management plan. However, an adequate outfall is required. The site was evaluated for two scenarios for drainage. The first scenario assumes the development area will be under one-acre threshold and provides a straight connection of a proposed underground pipe system to the inlet at the rear of the property. The second scenario assumes some form of detention will be required due to the constraints of the downstream system. In this scenario, a shallow underground detention system placed under the rear parking lot and drive aisle will satisfy stormwater quantity requirements. Both scenarios will require a small amount of fill to work. During full site design, detailed computations will determine which is the appropriate scenario for the project."

The BeeHive Homes construction will be residential in character and meant to blend into the community, with a favorable look as part of the neighborhood, and not standing out within the community. The typical BeeHive Homes becomes a great neighbor and is "adopted" within the community. Dr. Brooks has received written support from the Aberdeen Gardens Historic and Civic Neighborhood Association (attached) and the City of Hampton for her project. We look forward to being part of the elderly care solution and provide a much-needed service to the Hampton, Virginia area.

As outlined in the attached letter of June 27, 2022, from the City of Hampton's Chief Planner, Donald Whipple, ". . . Per the Hampton Community Plan, 2006 as amended, the recommended land use for this area is low density residential with the area on the east side of W, Queen Street, designated as mixed-use. Utilizing the direction of this land use policy, staff believes a nursing home would be a good transitional land use between the existing single-family residential neighborhood to the west and the commercial development on the east side of W. Queen Street. These commercial properties include two (2) hotels and an apartment community. In addition to city policy, staff's analysis and ultimate recommendation would also include evaluating the proposed concept plan, elevations, building materials, etc. as well as community input of the proposed development. These are critical application materials that must be taken into consideration in formulating staff's recommendation for the prospective rezoning and use permit applications. Although staff has seen some initial concepts for development, these application materials have not yet been finalized and without those materials staff cannot complete its full analysis and formulate an official recommendation at this time."

BeeHive Homes, the franchise, is actively engaged with Dr. Brooks in achieving the purposeful goal of franchising and building a facility. She attends their annual conferences and weekly training sessions, as often as she can, as she prepares to build the single-story facility. With twenty (20) rooms, the core part of the "Home," will have a central kitchen and dining area, next to a living space for residents to relax and participate in various activities, as well as view a television.

Each resident will be provided with the care they need, for normal activities of daily living (ADL), such as, bathing, dressing, medication administration, and eating needs. An individual care plan for each resident will be customized based on their specific level of needs in compliance with the Department of Health for the State

of Virginia. An outdoor vegetable garden and walking path are planned for the residents under direct supervision of the staff.

The Home, dedicated to memory care for seniors, will be constructed on one lot (after rezoning LSRN: 3004763) from residential (R-11) to multifamily (MD-4). The construction will have lock-coded doors and exit points to provide a safe environment to staff and residents. Upon opening, the Home will have set visiting and delivery hours between 8 am and 6 pm, 7 days per week.

Upon full resident capacity, the memory care facility (24-hour 7-day a week schedule), will maintain a staff of 18 employees (10 on day shift; 5 on evening shift; and 3 on night shift). To cover day and evening shifts, fifteen (15) parking spaces would be available. Five (5) additional parking spaces would be available for residents' families for a total of twenty (20) parking spaces. One additional parking space will be for handicap parking. A total of twenty-one (21) parking spaces will be provided which will support two (2) shifts and provide ample parking during the shift transitions. The residents will be between a Level 1 and Level 2 status of Dementia and will not include Level 3 residents that are combative or a danger to other residents and staff. The residents will not have the capacity to drive vehicles.

The parking lot will have limited, staged lighting that will provide a safe environment for visitors and staff, but not be a hindrance to other properties located near the site and will not be a nuisance.

For the circulation of vehicular traffic, the entrance and exit (same driveway) will be from West Queen Street to the property. A walled trash enclosure will be located within the rear most parking lot to be screened, from public view. Trash pickup will be by commercial dumpster containers for private refuse and will not protrude past building exterior wall face adjacent public right-of-way.

Site amenities include generous landscape garden areas with paved walking paths and bench seating. A four (4) foot fence will be in the front yard and shall be decorative metal picket fencing around the sunroom and a fence no taller than eight (8) feet will be around the perimeter of the property and shall be wooden or vinyl opaque.

Legal boundaries have already been provided to the City of Hampton. The current zoning classification for the property is single family residential (R-11). The existing building on 1807 West Queen Street is a single-family brick rancher will be sold and relocated or demolished if not sold. The following structures will be demolished: One car attached garage, carport, and accessory structures (900 square foot cinderblock building and one wooden storage shed).

The goal is to seek agreement from the City of Hampton, Virginia for Dr. Brooks to obtain rezoning and use permit approvals to build a single-story memory care facility that will have twenty (20) rooms and twenty-two (22) bathrooms. This facility will be a franchise of BeeHive Homes.
