I am resending this email to you as Nicole said she did not receive it from me. IT said there was a misdirect on my mailbox so it is possible that you did not receive it either. I am attempting to receive approvals for the FY2020 LEMPG grant so that it can go into Granicus for the September 9 City Council Meeting. This is an annual grant the we receive from VDEM.

Tim, I will drop the hard copies off as soon as I receive approvals from Nicole and Steve, hopefully in time to meet the Granicus deadline at noon on Friday.

Please find attached for your review the grant application forms for the 2020 Local Emergency Management Performance Grant. This is our annual Local Emergency Management Performance Grant that requires a 1:1 match. We meet our match through in-kind funds utilizing a salary match. This is a non-competitive grant that we receive an allocation notice prior to submission of a grant application. Please complete review of the Grant Proposal Overview and provide your response via email for the Grant Routing Form.

I need to bring to your attention a process review error on my part. I failed to process the grant review packet prior to the on-line submission of the grant application. I attempted to complete the grant application on the VDEM website and step one of the application process required signed grant forms for the on-line grant application. I failed to include the normal grant routing forms with the signature request because I thought that I would get a grant application to include in our internal Council grant packet when I submitted the grant forms. At this point the grant funds have not been released pending execution and submission of the Subaward Agreement included in this packet. I apologize for my process error and I will make every attempt to not make the same error again. Fortunately, this is a grant that we have received annually since at least 2006. Please let me know if you have any questions or concerns.

Program Purpose

The purpose of the EMPG is to provide federal funds to states to assist in preparing for all hazards, as authorized by Section 662 of the Post Katrina Emergency Management Reform Act (6 U.S.C. § 762) and the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. §§ 5121 et seq.). Title VI of the Stafford Act authorizes DHS/FEMA to make grants for the purpose of providing a system of emergency preparedness for the protection of life and property in the United States from all hazards and to vest responsibility for emergency preparedness jointly in the federal government, states, and their political subdivisions. The federal government, through EMPG, provides direction, coordination, and guidance, and provides necessary assistance, as authorized in this title, to support a comprehensive all-hazards emergency preparedness system.

The FY 2020 LEMPG will provide federal funds to assist emergency management agencies to obtain the resources required to support implementation of the National Preparedness System and the National Preparedness Goal (the Goal) of a secure and resilient nation. Among the five basic homeland security missions noted in the DHS Quadrennial Homeland Security Review, LEMPG supports the goal to Strengthen National

Ms. Mary Bunting

Preparedness and Resilience. EMPG supports comprehensive, all-hazards emergency preparedness system by building and sustaining the core capabilities contained in the Goal. EMPG funding is used to support a whole community approach to strengthen a state's or community's emergency management program. Examples of tangible EMPG funded activities include:

- Conducting risk assessments, assessing capabilities, identifying preparedness needs, and updating emergency plans;
- Building or augmenting core capabilities;
- Designing and conducting exercises that engage the whole community of stakeholders to validate core capabilities;
- Conducting emergency management training; and
- Providing funding support for emergency management personnel.

VDEM recognizes the critical role of emergency management at the local level. Strong local emergency management programs keep the Commonwealth safer, and allow state and local government to respond and recover effectively and efficiently when an emergency or disaster occurs. The objective of the LEMPG, then, is to support your locality's efforts to develop and maintain a Comprehensive Emergency Management Program.

Important Award Terms and Conditions

Subrecipients must comply with the following federal requirements:

- FY 2020 Emergency Management Performance Grant Program (EMPG) Notice of Funding Opportunity (NOFO)
[Emergency Management Performance Grant Program NOFO](#)
- The Preparedness Grants Manual
[Preparedness Grants Manual](#)
- Department of Homeland Security Standard Terms and Conditions for 2020
[DHS Standard Terms and Conditions](#)
- 2 CFR Part 200 Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards
[2 CFR Part 200 Uniform Administrative Requirements](#)

Cost Share/Match

The federal share that is used towards the LEMPG Program budget must be at least 50 percent of the total budget. The subrecipient must equally match (cash or in-kind) the federal contribution pursuant to Sections 611(j) and 613 of the *Robert T. Stafford Disaster Relief and Emergency Assistance Act* (Pub. L. No. 93-288), as amended, (42 U.S.C. §§ 5121et

To meet matching requirements, the contributions must be verifiable, reasonable, allowable, allocable, and necessary under the grant program and must comply with all federal requirements and regulations.

Management and Administration (M&A)

Your local emergency management agency may retain and use up to five percent of the award for local management and administration purposes. M&A activities are those directly related to managing and administering LEMPG Program funds, such as financial management and monitoring. It should be noted that salaries of local emergency managers are not typically categorized as M&A, unless the local emergency management agency chooses to assign personnel to specific M&A activities.

Indirect (Facilities & Administrative [F&A]) Costs

Indirect costs are allowable under this program, as described in 2 C.F.R. § 200.414. With the exception of recipients who have never received a negotiated, indirect cost rate as described in 2 C.F.R. § 200.414(f), recipients must have an approved indirect cost rate agreement with their cognizant Federal agency to charge indirect costs to this award. A copy of the approved rate (a fully executed, agreement negotiated with the applicant's cognizant Federal agency) is required at the time of application, and must be provided to FEMA before indirect costs are charged to the award.

Extension requests will be granted only due to compelling legal, policy, or operational challenges. Extension requests will only be considered for the following reasons:

- Contractual commitments by the grant recipient with vendors or subrecipients prevent completion of the project within the existing period of performance
- The project must undergo a complex environmental review that cannot be completed within existing period of performance
- Projects are long-term by design and therefore acceleration would compromise core programmatic goals
- Where other special circumstances exist

Recipients must submit all extension requests to VDEM via upload into eGMS **no later than 90 days prior to June 30, 2021.**

Initiate the steps described under *Accessing Your Allocation* **within 30 days from the date of this notification.** If you have any questions regarding this award, please contact Lisa Foley in the Grants Office at 804-267-7721 or lisa.foley@vdem.virginia.gov.

Appendix A. Guidance for Supporting Photographs for EHP Grant Submissions

Photographs are a vital component of the EHP review process and add an additional level of understanding about the nature and scope of the project. They also provide pre-project documentation of site conditions. Please follow the guidance provided below when preparing photographs for your EHP submission. The following pages provide examples of best practices used in earlier EHP submissions.

Minimum requirements for photographs

1. Photographs should be in color.
2. Label all photographs with the name of facility, location (city/county, state) and physical location (physical address or latitude-longitude).
3. Label the photographs to clearly illustrate relevant features of the project, such as location of installed features (e.g., cameras, fences, sirens, antennas, generators) and ground disturbance. See examples below.
4. Identify ground disturbance. Adding graphics to a digital photograph is a means to illustrate the size, scope and location of ground disturbing activities.

Best Practices

1. Provide photographs in a separate file.
2. Place no more than 2 pictures per page.
3. Compressing pictures files (such as with Microsoft Picture Manager)¹ or saving the file in PDF format will reduce the size of the file and facilitate e-mail submissions.
4. Identify the photograph file with the project name so that it can be matched to the corresponding FEMA EHP screening form.
5. Maximum file size for enclosures should not exceed 12 MB. If the total size of files for an EHP submission exceeds 12 MB, send the submission in multiple e-mails.
6. If necessary, send additional photographs or data in supplemental e-mails. Please use the same e-mail subject line with the additional label: 1 of x, 2 of x, . . . x of x.

Options for Creating Photographs

1. Obtain an aerial photo. There are multiple online sources for aerial photographs.
2. For the aerial photo, use the screen capture feature (Ctrl + Print Screen keys) and copy the image to photo editing software, such as Paint, or PhotoShop.¹ Use that software to crop the image so the photo has the content necessary.
3. Open PowerPoint, or other graphics-oriented software, and paste the aerial or ground-level photograph on the canvas.
4. Use drawing tools, such as line drawing and shapes, to indicate the location of project features (for example: fencing, lighting, sirens, antennas, cameras, generators).
5. Insert text to label the features and to label the photograph.
6. Use drawing tools to identify ground-disturbing activities (if applicable).
7. Save the file with the project name or grant number so that it can be appropriately matched to the corresponding FEMA EHP screening form. Include this file with the EHP screening when submitting the project.

Example Photographs

Aerial Photographs. The example in Figure 1 provides the name of the site, physical address and proposed location for installing new equipment. This example of a labeled aerial photograph provides good context of the surrounding area.

Figure 1. Example of labeled, color aerial photograph.

Ground-level photographs. The ground-level photograph in Figure 2 supplements the aerial photograph in Figure 1, above. Combined, they provide a clear understanding of the scope of the project. This photograph has the name and address of the project site, and uses graphics to illustrate where equipment will be installed.

Figure 2. Example of ground-level photograph showing proposed attachment of new equipment.

Appendix A. Supporting Photographs for EHP Grant Submissions

Ground-level photograph with equipment close-up. Figure 3 includes a pasted image of a CCTV camera that would be placed at the project site. Using desktop computer software, such as PowerPoint,¹ this can be accomplished by inserting a graphic symbol (square, triangle, circle, star, etc.) where the equipment would be installed. This example includes the name and location of the site. The site coordinates are in the degree-minute-second format.

The example in Figure 4 shows the proposed location for the concrete pad for a generator and the ground disturbance to connect the generator to the building's electrical service. Communications equipment photographs. The example in Figure 5 supports a project involving installation of equipment on a tower. Key elements are identifying where equipment would be installed on the tower, name of the site and its location. This example provides site coordinates in decimal format.

Figure 5. Ground-level photograph showing proposed locations of new communications equipment on an existing tower.

Interior equipment photographs. The example in Figure 6 shows the use of graphic symbols to represent security features planned for a building. The same symbols are used in the other pictures where the same equipment would be installed at other locations in/on the building. This example includes the name of the facility and its physical address.

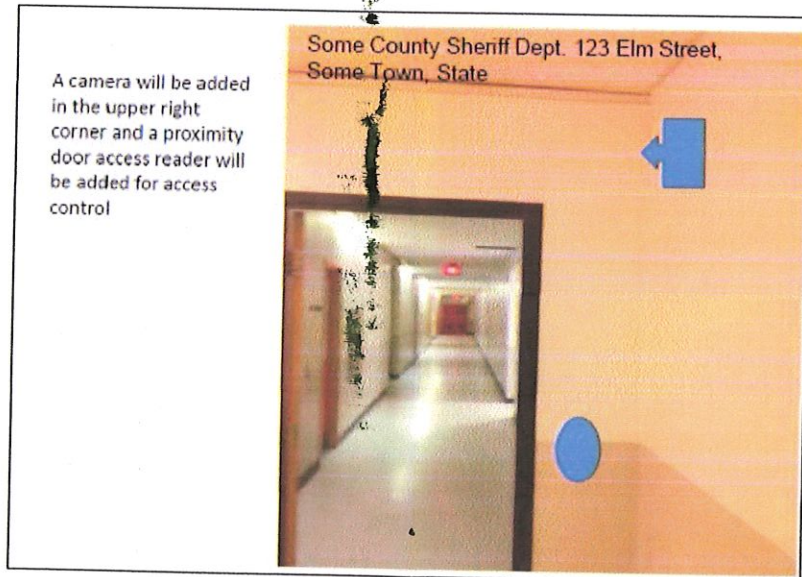

Figure 6. Interior photograph showing proposed location of new equipment.

Ground-level photographs of nearby historic structures and buildings. Consultation with the State Historic Preservation Office (SHPO) may be required for projects involving structures that are more than 50 years old, or are on the National Register of Historic Places. In that event, it will be necessary to provide a color, ground-level photograph of each side of the building/structure.

1 Use of brand name does not constitute product endorsement, but is intended only to provide an example of the type of product capable of providing an element of the EHP documentation.
