Regulation of Recreational Vehicles

PURPOSE/BACKGROUND:

Recreational vehicles, including campers, trailers, boats, etc. are currently regulated by the zoning ordinance. These standards were written decades ago when these vehicles were less common and generally smaller in size. As a result, many properties have recreational vehicles that are out of compliance with these standards. Because of the high number of noncompliant vehicles, enforcement of this ordinance was suspended in early 2016 so that new standards could be drafted. Staff will provide background information and options for regulation of recreational vehicles.

Recommendation:

Hear briefing and provide feedback to staff - action to be scheduled after Council input
